

OEM 800-7RE

800 WP - module
Vacuumtube collector VRK OEM 800-7RE
with a reflector for more power

Advantages of the collector:

- **Plug-in connection of the tube**
(tube easily exchangeable!)
- **Tube rotatable!** (therefore all assembly variations without under construction possible.)
- **Tube distance always the same!**
Even with the use of multiple collectors.
- **Little fluid volume**
- **Ability of roof assembly**
- **Self carrying construction**
(based on this no complex support system necessary)
- **NARVA Vacuum tubes made in Germany**
- **Collector made in Germany**
- **Fast and safe assembly with the Euro-Conus Connector**
- **NARVA Vacuum tubes with double sided absorber area**
(therefore higher performance)
- **Shortest energy amortisation, because of prevention of aluminium.**

Technical data:

Seize (L x W x H): 2100 x 700 x 120

Weight: 25 kg

Connection: EURO CONUS 3/4"

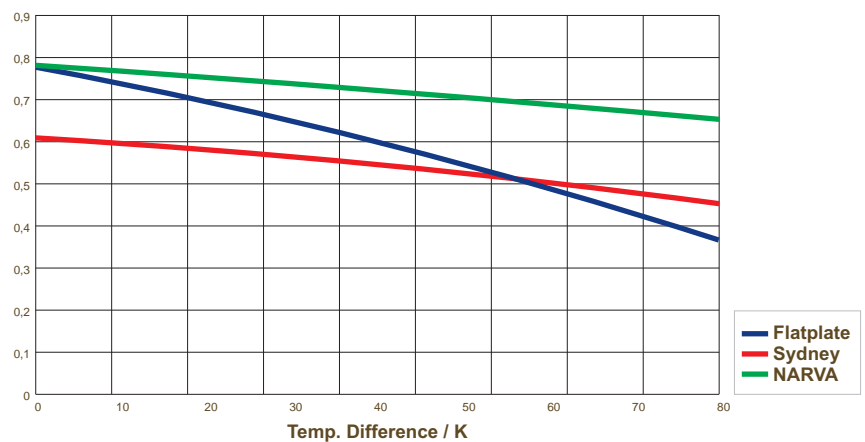

Collector area: 1,5 m²

ETA 0 = 0,8 *

Max. operating pressure: 10 bar

Max. stagnation temperature: 300 ° C *

Efficiency of diverse collectors:

- little Zeta Values based on zeta-plus-technology
- little pressure loss
- even flow of liquid in each tube based on equal zeta-values at every connection
- warranty based on zeta-plus-seal of approval

* all data are company internal measures
