**FOR YOUR WARM HOME FROM
THE POWER OF THE SUN**

WHY SOLAR HEAT?

Who does not love to enjoy a warm home and a hot bath after a hard day? And that is solely produced by the power of the sun. Completely environmentally friendly and CO₂ free. 365 days a year.

Save energy and preserve the environment

Sounds great? This is a matter of course for owners of a solar system. The free energy of the sun is converted into climate-neutral heat by our state-of-the-art solar systems. This not only protects your wallet, but also the environment. And become a hero of heat along the way.

THAT'S WHY AKOTEC!

ENVIRONMENTALLY FRIENDLY AND ECONOMICAL

The sun does not send an invoice. With the heat from a solar system from AKOTEC, you not only protect the environment, but also your wallet.

GREEN SOLAR HEAT WITH A 20-YEAR GUARANTEE

AKOTEC products are characterized by their unique performance and highest quality. Our solar systems have a yield duration of more than 25 years and that with a 20-year guarantee

100% MADE IN GERMANY

Our products are self-developed and are 100% made in Germany. Our experienced team designs and produces our high-performance systems for you at the production site in Angermünde.

OUR UNIQUE ABILITY MEANS:

SAFE HEAT

Whether large or small system: The heat pipe tubes of our solar systems have an integrated overheating protection. The tubes simply switch off when no more heat is required. So you can always enjoy the sun carefree and safely.

YOU WANT THAT CERTAIN SOMETHING?

Your solar system fits in well with the look of your house or can be optically staged. Diagonally, on the facade or in the middle of the meadow. Thanks to the flexible installation options for our collectors, almost any idea can be turned into reality.

NICE EXTRAS

AKOTEC solar systems can do more than just support your heating. With resource-saving water heating, you can heat up the hot water for your dishwasher and washing machine in an environmentally friendly way. This not only saves energy, but also money.
